Heartburn at Dinner:

You're eating dinner in a local restaurant with your wife and her best friend. You are bored to death so the noise of crashing dishes in the kitchen is a welcome distraction from your evening. However the armed men that burst into the dining room are not as welcome. You set in the back of the room on purpose so you could survey the room and see anyone out of the ordinary as they entered the restaurant. Now your table being nearest the kitchen door has made you the first ones that the bad guys confront. As the armed men approach your table you make your move and draw and fire on the three closest thugs from your seat. You then hear more crashing in the kitchen and move for the kitchen door to gain a tactical advantage on any more intruders that might be in there. As you do you encounter and engage a third armed man. At the kitchen door you spot two more intruders in the kitchen and engage them both before they can get to the dining room to assist there now departed comrades.
